

2022 – our annual review

Thanks to our customers
and the entire Eomys team

e-NVH Consulting services

More than 30 projects with
our customers worldwide

e-NVH Consulting Services

Many optimized machine topologies

- Asymmetrical IPM
- Induction machines with odd slot numbers
- Axial flux PMSM
- External rotor PMSM

e-NVH Training Services

Nearly 100 engineers formed in the field of magnetic noise and vibrations in electrical systems

e-NVH Training Services

In total, almost 1 full month spent in training with our customers

e-NVH Software Services

16 Manatee V2 releases all
over the year

e-NVH Software Services

10 new important features

- Parameter Sweep
- On load SCIM (including eccentricity and uneven airgap)
- Sound Quality Metrics
- Skew Solution Environment
- Rotor and stator notching
- Externally Excited Synchronous Machines
- External noise source import
- Single speed simulation
- DXF import rework
- Uneven North/South IPMSM machine

See us in 2023!
